Moderate Conscious Sedation: Nitrous Oxide and Oral Sedation, includes Medical Emergencies in the Dental Office (Are You Ready?) – 3-Day course

DRS. PETER NKANSAH and MICHELE TANG **Category 1 & 2**

LECTURES:

Online: November 14, 2024
In-person: November 15, 2024

HANDS-ON/EXAM:

In-person: November 16, 2024

COURSE OUTLINE

There are many stress-reduction techniques in dentistry available to us today. Few, if any, carry the advantages that nitrous oxide and benzodiazepines do. Dentists will leave this course with the knowledge of how to safely and effectively incorporate nitrous oxide and oxygen into their practice, as well as, oral benzodiazepines alone or in combination with nitrous oxide. In addition, as a requirement of the RCDSO, participants enrolled in this course must review the more common and the more-dangerous emergencies that we might face. There is a written examination for certification with the RCDSO. **This is a limited enrollment course.**

LEARNING OBJECTIVES

Course content includes a review of:

- RCDSO standard of practice; patient monitoring requirements; respiratory and cardiovascular system physiology; pharmacology of nitrous oxide and benzodiazepines; conscious sedation armamentarium;
- Oral sedation regimens; nitrous oxide administration; medical emergencies and airway management; incorporation of moderate conscious sedation into your practice;
- Patient health history review;
- The incidence of medical emergencies and how to anticipate and recognize them;
- Emergency airway management;
- Pharmacology and use of medical emergency drugs; Medical emergency kit review;
- How to treat the treatable medical emergencies (scenarios and algorithms), and when to get help;
- How to organize your team and your office to ensure the best possible outcomes.

DR. PETER NKANSAH, BSc (Hon), DDS, MSc, Dip Anes, FADSA, Cert. Specialist in Dental Anesthesia

Dr. Nkansah is a certified specialist in Dental Anesthesia (Ontario) in private practice in Toronto. He teaches at Western University and is an assistant professor at the University of Toronto. He is a Course Director for ACLS at Sunnybrook Health Sciences Centre and on the editorial board of Oral Health. A Fellow of the American Dental Society of Anesthesiology, the Pierre Fauchard Academy, he is also the dental consultant for numerous sports organizations and the RCDSO.

DR. MICHELLE TANG, BSc, DDS, MSc (Dental Anesthesia), Dip ADBA, Dip. NDBA

Dr. Tang is a Board Certified Specialist in Dental Anesthesia. She is also a diplomat of the American Dental Board of Anesthesiology and the National Dental Board of Anesthesiology. Dr. Tang teaches as a Clinical Instructor in the Discipline of Dental Anesthesia at the University of Toronto, Faculty of Dentistry and also practices as a dentist anesthesiologist in private clinics in Brampton, Mississauga and Oakville, Ontario.
